DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a semiconductor device, classified in class 257, subclass 758.
 - II. Claims 9-15, drawn to a method of forming a semiconductor device, classified in class 438, subclass 612.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product of group I could be manufactured by a materially different process that could include forming a first metal layer and patterning to leave the conductive horizontal bodies, forming a first insulating layer that leaves the horizontal bodies exposed, depositing a second conductive layer and patterning to form the extensions and the second level conductive bodies over the first insulating layer, and depositing a second insulating layer that leaves the second level conductive bodies exposed.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
